Tele-Messenger Plus Phone Call List Import

Easily Import Phone Number Dialing Lists from any Source using our Exclusive Call List Wizard!

- In order for the Tele-Messenger Plus to make calls, it must have a list of phone numbers to dial. The Tele-Messenger Plus Auto Dialer program is designed to dial numbers from a phone number list, which includes information such as name, address, city, state and zip, so that you can follow up your leads by mail or by phone. Tele-Messenger Plus comes with our exclusive phone list creation Wizard which allows for "Quick-Loading" of your calling list phone numbers, thereby allowing any type of phone data to be loaded quickly and easily.

File Selected for Loading
C:\CallList\Zip 06470.txt

Step 1: Easily Load a Phone Number Calling List using the Create List Wizard. Phone Number data files are quickly loaded directly into the Dialer database, and are ready to dial

Tele-Messenger Plus Script Development Center Our Exclusive Script Template Tool allows for Effortless Script Design!

- The Tele-Messenger Plus uses a voice script to guide the listener through the different parts of your campaign. Each script has been designed for a different function, such as delivering your message and then recording information such as a name and convenient call back time, recording your message to an answering machine or live transferring an interested prospect to you to receive further information.

Tele-Messenger Plus Recording Studio

Develop Professional Quality Voice Messages in the Recording Studio!

- The Tele-Messenger Plus Recording Studio is a professional level facility for recording voice messages which are played to a live answer response, or recorded to an answering machine upon detection. Voice messages are recorded by telephone dial-in using the phone lines connected for outbound dialing. The Recording Studio works just like a traditional tape recorder; all voice messages are automatically recorded using the highest quality digital voice format.

To Record the messages your listeners will hear, simply select the Script in the left window; all required Voice Message files will be displayed in the right window. Select the Message File from the display and then click the Record and Playback buttons using the convenient "Tape Recorder" style controls.

Tele-Messenger Plus Dialing Status Center

View the Progress of each Active Campaign in Real-Time, and Maximize the Effectiveness of your Dialing!

- The Tele-Messenger Plus Dialing Status Center displays the current progress of each active phone line in real-time. This window allows for monitoring of each dialing schedule, the current script voice message playing, and the status of a call transfer. The Campaign Name is displayed, as well as the exact telephone number dialing. The user can determine the effectiveness of a Dialing Campaign immediately, and make adjustments to the voice recordings as needed, by viewing the call progress of each call. This permits optimization of your broadcast for maximum effectiveness.

Start Dialing

	Campaign	Phone Number	Current Status
<input type="checkbox"/>	Campaign 1	12032704870	Waiting for Dial Tone; Dialing Number
<input type="checkbox"/>	2 Campaign 1	12032704871	Delivering Message to Answering Machine
<input type="checkbox"/>	3 Campaign 2	12032704860	Set Call Status to HOT
<input type="checkbox"/>	4 Campaign 2	12032704861	Asking for Information

The Dialing Status Control Center Displays the progress of each active phone line in real-time, and permits for immediate review of the effectiveness of a Dialing Campaign to maximize its effectiveness
